

Prijesh Bhingradiya

(469) 987-9272 | prijeshbhingradiya627@gmail.com | github.com/prijeshb | Dallas, TX

Technical Skills

Languages: JavaScript, TypeScript, Python, Java, C++, C#, PHP

Frontend: React (Redux), Angular (NgRx), HTML5, CSS3, GraphQL, Progressive Web Apps (PWA)

Backend: Node.js, Django, REST APIs, Microservices, MVC Architecture, Repository & Factory Patterns

Cloud & DevOps: AWS (EC2, Lambda, CloudWatch, SQS, SNS, S3), Docker, CI/CD, Azure DevOps, Heroku, Netlify

Databases: MSSQL, PostgreSQL, MongoDB, Firebase Firestore

AI / ML: NLP, Deep Learning, CNN, Word2Vec, NLTK, Flask

Tools: Git, Postman, Workbox, Agile/Scrum

Professional Experience

Senior Software Developer

Jan 2024 – Feb 2026

Paycom

Irving, TX

- Architected AI chatbot data ingestion layer using GraphQL, accelerating NLP-driven client query processing to support AI-powered widgets at enterprise scale.
- Refactored monolithic MVC APIs into microservices using Repository and Factory design patterns, reducing API response time by **25%**.
- Boosted database performance via query optimization with indexes, CTEs, and temp tables, reducing API latency by **60%** across high-traffic endpoints.
- Optimized dashboard performance with pagination, server-side caching, and WebSocket integration, cutting page load times by **40%**.
- Rebuilt legacy PHP UI in React with reusable component architecture, improving responsiveness and reducing load time by **30%**.
- Built asynchronous job queue system handling **100+ tasks/day**, decoupling long-running operations from the request lifecycle and improving user experience.
- Reduced deployment incidents by **25%** through enhanced Docker container orchestration and improved secret management.
- Led engineering mentorship initiatives resulting in **30%** team skill growth and **20%** improvement in overall code quality.

Web Developer

Jun 2022 – May 2023

University of Texas at Dallas

Dallas, TX

- Redesigned university web apps, increasing load speed by **40%**, reducing code duplication by **10%**, and boosting engagement by **20%** through reusable components and UI/UX optimizations.

Full-Stack Developer

Feb 2021 – Dec 2021

Freelance

Surat, India

- Designed and delivered end-to-end web applications in logistics and blockchain domains using React, Angular, Django, Node.js, MySQL, and Firebase.
- Adopted Agile methodologies with Azure DevOps, achieving **50%** faster project delivery and **20%** reduction in development time.

Software Engineer

Jul 2019 – Feb 2021

Cybage Software Pvt. Ltd.

Gandhinagar, India

- Developed modules for a multi-tenant SaaS platform — Client Search, Payments (Stripe/Global Payments), Booking System, SMS Alerting, and POS — using Angular, React, Backbone.js, AWS Lambda, MSSQL, and PostgreSQL.
- Implemented high-performance client search via C++/C# transpilation and multithreading, improving efficiency by **30%**.
- Built Node.js/Mustache email UI testing tool eliminating **90%** of unnecessary cloud deployments, reducing dev environment costs.

Projects

Hotel Review Analyzer

Python · NLTK · Flask · 1D-CNN · Word2Vec · Deep Learning

- Developed a deep learning NLP pipeline to extract meaningful insights from hotel review text fragments using Python and NLTK.
- Implemented 1D-CNN with Word2Vec embeddings to capture spatial and semantic dependencies in text, treating linguistic patterns as high-dimensional feature maps.
- Optimized multi-class 5-star rating classification using SoftMax activation and max-pooling for accurate probabilistic output.

Rental Web App (PWA)

React · Progressive Web App · Workbox · Firebase · Service Workers

- Built a fully offline-capable PWA for listing and renting electronic gadgets with filters, search, and wishlisting.
- Leveraged Workbox service workers for intelligent caching and background sync, delivering a native-like mobile web experience.

Education

M.S. in Computer Science | GPA: 3.69/4.0

University of Texas at Dallas

Jan 2022 – Dec 2023

Richardson, TX
